PROFESSIONAL SUMMARY

Level 12 - AI & Data / Data Engineering, Management & Governance Associate with experience in Data Operation Support. Currently expanding skills in Python since January and gaining foundational knowledge in data engineering. Experienced in supporting cloud and data platforms with a focus on operational excellence. Eager to grow expertise in data engineering and contribute to enterprise data solutions through continuous learning and collaboration.

WORK EXPERIENCE

Level 12 - AI & Data / Data Eng, Mgmt & Governance Associate

Accenture, Inc. – Taguig, Metro Manila, Philippines

Feb 2023 – Jan 2026

- Maintained and monitored ETL pipelines using Azure Data Factory, providing support for pipeline failures, performance degradation, and long-running processes.
- Provisioned and managed Databricks workspaces and clusters, including access provisioning and configuration changes.
- Managed Azure resources including Databases, Storage Accounts, and Data Lake.
- Collaborated with Microsoft Engineers to conduct deep-dive investigations and root cause analysis.
- Implemented ITIL-based Incident, Change, and Service Transition processes to ensure smooth deployments.
- Acted as Point of Contact (POC) for Change Management, overseeing deployment approvals and risk assessments.
- Participated in Avanade FY22 Data and Analytics Bootcamp, gaining practical experience in ETL pipelines, Power BI dashboards, and advanced analytics tools (SSIS, SSRS, SSAS).

OSP Design Engineer

Wuhan Fiberhome International Technologies Phils. – Makati City, Philippines

Jul 2020 – Apr 2022

- Streamlined design processes using CAD software to improve project efficiency.
- Ensured compliance with industry standards by updating design documentation.
- Collaborated with cross-functional teams to integrate engineering designs into final products.

- Conducted design assessments and evaluated alternative models to meet evolving project demands.
-

EDUCATION

Bachelor of Science in Electronics Engineering (BSECE)

ICCT Colleges Foundation, Inc. – Cainta, Rizal, Philippines

Jan 2019

SKILLS

- Databricks
 - Azure Data Factory, Azure SQL, Azure Storage, Azure Data Lake
 - Python, SQL
 - Power BI (Data Visualization & Reporting)
 - ITIL Framework: Incident Management, Change Management, Service Transition
 - Problem-Solving, Collaboration, Adaptability, Time Management
-

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals
 - PL-300: Power BI Data Analyst Associate
 - AI-900: Azure AI Fundamentals
 - AI-102: Azure AI Engineer Associate
 - Python Certified (FreeCodeCamp)
 - Data Analysis with Python (FreeCodeCamp)
-

PROJECTS

End-to-End Azure ETL

- Designed and implemented a complete ETL pipeline using **Azure Data Factory**, **Databricks**, and **Azure Data Lake (Bronze–Silver–Gold layers)**.
- Built curated datasets in **Azure Synapse** and connected them to **Power BI** for interactive dashboards.

- Developed visuals answering key business questions: top products, customer segmentation, regional sales, monthly trends, and declining categories.

Power BI Superstore Dashboard

- Created an interactive dashboard analyzing **Superstore sales data**.
- Visualized KPIs such as **sales by region, profit by category, shipping performance, and customer segments**.
- Implemented **DAX measures** for profitability, discount impact, and order trends.
- Designed a clean, portfolio-ready dashboard layout to highlight actionable insights for retail decision-making.

Telecom Customer Churn Analysis

- Conducted churn analysis using **Excel**, focusing on retention strategies.
- Built dashboards to visualize churn patterns and highlight KPIs for decision-making.

Medical Data Visualizer

- Developed a Python-based visualization tool to analyze medical examination data.
- Implemented statistical plots (categorical plots, correlation heatmaps) to identify health trends.

Additional Projects You can explore more of my work, including Python applications, data visualizations, and analytics projects, on my GitHub: github.com/kyah-Andy
